

The toxins that have been rendered inert in the fuel treatment reduce emissions as well improving fuel efficiency.

The average increase in fuel economy for gasoline engines is 5% - 25% and 10% - 40% for diesel engines.

The emissions produced in non-treated fuels, emit dangerous quantities of Sulfur Oxide (SOx), Nitrogen Oxides (NOx), Carbon Monoxide (CO) and Carbon Dioxide (CO2).

For decades these commonly known toxins have been proven to cause serious threats to our environment and health.

The emissions produced worldwide have shown a monumental impact on the overall health of the environment and the quality of our lives.

The solution is complex yet simple.

The Hologram device removes a wide range of pollutants that includes:

Sulfur oxides (SOx) – a chemical compound produced in various industrial processes.

Since coal and petroleum often contain sulfur compounds, their combustion generates sulfur dioxide, and further oxidation of this in the presence of a catalyst forms acid rain.

Nitrogen oxide (NOx)

Carbon monoxide (CO) – It is a product by incomplete combustion of fuel such as natural gas, coal or wood.

Vehicular exhaust is a major source of carbon monoxide.

Carbon dioxide (CO2) – a greenhouse gas, emitted from combustion, cements production, and associated with ocean acidification.

For the process to be successful, the scalar field must come in contact with the fuel itself, so the newly programmed holographic device is attached directly to the surface of the vehicle's fuel tank.

When the fuel comes in contact with the field, the Key Signature changes to match the new frequency.

Quantum Absorption then enables the frequency to affect the remainder of the fuel.

The improved fuel now burns completely, while consuming any waste residue left as a result of previous incomplete combustion.

The end effect includes reduced emissions, fuel savings, and increased performance.

These steps create a Key Signature that is designed to completely erase its target.

For the purposes of manipulating vehicular exhaust Holidium uses a static application.

Anti-Smog Hologram Treats Up To A 75 gal Tank

Before installing the fuel chip hologram sticker on the tank, take note of the smell that will be coming from the exhaust.

To Begin, Place the frequency hologram sticker on your car or trucks gas tank for improved emissions (0-CO), (0-NOx), and a cleaner, better burning engine. Locate the vehicle's fuel tank. If you have a skip plate, have an authorized mechanic show you where the fuel tank is. If there are two fuel tanks, you will need two fuel chip devices.

It starts to work in 30-60 seconds to neutralize toxins in the fuel. The fuel is per-treated before combustion, not after like catalytic converters or other post combustion devices.

There should be mostly water vapor coming out and steam-like smell.

Now your exhaust emissions are greatly reduced and in time, as your engine cleans out accumulated deposits, your gas mileage will improve along with an increase in engine life.

Qualify For Annual CARBON TAX Allowances

By Reducing Emissions using The Anti-Smog Hologram chip that deletes exhaust emissions by per-treating 78 found chemicals in unleaded fuel emissions.

This Gasoline hologram pre-treats the fuel in the holding tank through a frequency field when placed on the tank during the per-treatment of fuel trace toxin molecules are neutralized.

When the pre-treated fuel reaches the engine cylinders combined with air, the combustion process is more complete.

HolidiumLabs

The Anti-Smog Fuel Chip Hologram Device Information

(Powered by HOLIDIUMLABS).

www.HolidiumLabs.com

Holidium provides that complex solution in a simple way to ensure our future will be sustainable with a clean and healthy environment.

Holograms are a form of digital homeopathy which uses informational code sets (of energetic essences) embedded into the hologram "chip" to help amplify frequencies you want and help negate frequencies you don't want in your field.

The Holidium Lab Holograms have several products (codes sets) geared toward whatever area of total wellness you are looking to improve.
